

Update EPUB tables

Align target IDs

Temporary step to avoid running BCC full deployment until target IDs will be aligned across all environments

Save IDs from source environment where dump was exported

Production target

- *source_pub_main_target*

```
select target_id from epub_target where  
display_name='<Production_Target_Name>' and main_target_id is null;
```

- *source_pub_secondary_target*

```
select target_id from epub_target where  
display_name='<Production_Target_Name>' and main_target_id =  
'<source_pub_main_target>';
```

Staging target

- *source_pub_main_stg_target*

```
select target_id from epub_target where  
display_name='<Staging_Target_Name>' and main_target_id is null;
```

- *source_pub_secondary_stg_target*

```
select target_id from epub_target where  
display_name='<Staging_Target_Name>' and main_target_id =  
'<source_pub_main_stg_target>';
```

Save IDs from destination environment where dump will be imported

Production target

- *dest_pub_main_target*

```
select target_id from epub_target where  
display_name='<Production_Target_Name>' and main_target_id is null;
```

- *dest_pub_secondary_target*

```
select target_id from epub_target where  
display_name='<Production_Target_Name>' and main_target_id =  
'<dest_pub_main_target>';
```

Staging target

- *dest_pub_main_stg_target*

```
select target_id from epub_target where  
display_name='<Staging_Target_Name>' and main_target_id is null;
```

- *dest_pub_secondary_stg_target*

```
select target_id from epub_target where  
display_name='<Staging_Target_Name>' and main_target_id =  
'<dest_pub_main_stg_target>';
```

Disable constraints

```
alter table EPUB_TR_AGENTS disable constraint PT_TR_PR_ID_FK;  
alter table EPUB_TR_AGENTS disable constraint PT_AG_AG_ID_FK;  
alter table EPUB_TR_REP_TBL_MP disable constraint TR_TBL_PR_ID_FK;  
alter table EPUB_TARGET disable constraint TARGETS_PK cascade;
```

Update IDs

Change to appropriate values variables:

- *source_pub_main_target*
- *dest_pub_main_target*
- *source_pub_secondary_target*
- *dest_pub_secondary_target*
- *source_pub_main_stg_target*
- *dest_pub_main_stg_target*
- *source_pub_secondary_stg_target*
- *dest_pub_secondary_stg_target*

Production target

```

update EPUB_PR_TG_AP_TS set target_id='<source_pub_main_target>' where
target_id='<dest_pub_main_target>';
update EPUB_PR_TG_DP_ID set target_id='<source_pub_main_target>' where
target_id='<dest_pub_main_target>';
update EPUB_PR_TG_DP_TS set target_id='<source_pub_main_target>' where
target_id='<dest_pub_main_target>';
update EPUB_PR_TG_STATUS set target_id='<source_pub_main_target>' where
target_id='<dest_pub_main_target>';
update EPUB_PRJ_TARGT_WS set target_id='<source_pub_main_target>' where
target_id='<dest_pub_main_target>';
update EPUB_PRJ_TG_SNSHT set target_id='<source_pub_main_target>' where
target_id='<dest_pub_main_target>';
update EPUB_TL_TARGETS set target_id='<source_pub_main_target>' where
target_id='<dest_pub_main_target>';
update EPUB_TL_TARGETS set target_id='<source_pub_secondary_target>' where
target_id='<dest_pub_secondary_target>';
update EPUB_TR_AGENTS set target_id='<source_pub_main_target>' where
target_id='<dest_pub_main_target>';
update EPUB_TR_AGENTS set target_id='<source_pub_secondary_target>' where
target_id='<dest_pub_secondary_target>';
update EPUB_TR_DEST set target_id='<source_pub_main_target>' where
target_id='<dest_pub_main_target>';
update EPUB_TR_DEST set target_id='<source_pub_secondary_target>' where
target_id='<dest_pub_secondary_target>';
update EPUB_TR_REP_TBL_MP set target_id='<source_pub_main_target>' where
target_id='<dest_pub_main_target>';
update EPUB_TR_REP_TBL_MP set target_id='<source_pub_secondary_target>'
where target_id='<dest_pub_secondary_target>';

```

Staging target

```

update EPUB_PR_TG_AP_TS set target_id='<source_pub_main_stg_target>' where
target_id='<dest_pub_main_stg_target>';
update EPUB_PR_TG_DP_ID set target_id='<source_pub_main_stg_target>' where
target_id='<dest_pub_main_stg_target>';
update EPUB_PR_TG_DP_TS set target_id='<source_pub_main_stg_target>' where
target_id='<dest_pub_main_stg_target>';
update EPUB_PR_TG_STATUS set target_id='<source_pub_main_stg_target>'
where target_id='<dest_pub_main_stg_target>';
update EPUB_PRJ_TARGT_WS set target_id='<source_pub_main_stg_target>'
where target_id='<dest_pub_main_stg_target>';
update EPUB_PRJ_TG_SNSHT set target_id='<source_pub_main_stg_target>'
where target_id='<dest_pub_main_stg_target>';
update EPUB_TL_TARGETS set target_id='<source_pub_main_stg_target>' where
target_id='<dest_pub_main_stg_target>';
update EPUB_TL_TARGETS set target_id='<source_pub_secondary_target_stg>'
where target_id='<dest_pub_secondary_target_stg>';
update EPUB_TR_AGENTS set target_id='<source_pub_main_stg_target>' where
target_id='<dest_pub_main_stg_target>';
update EPUB_TR_AGENTS set target_id='<source_pub_secondary_target_stg>'
where target_id='<dest_pub_secondary_target_stg>';
update EPUB_TR_DEST set target_id='<source_pub_main_stg_target>' where
target_id='<dest_pub_main_stg_target>';
update EPUB_TR_DEST set target_id='<source_pub_secondary_target_stg>'
where target_id='<dest_pub_secondary_target_stg>';
update EPUB_TR_REP_TBL_MP set target_id='<source_pub_main_stg_target>'
where target_id='<dest_pub_main_stg_target>';
update EPUB_TR_REP_TBL_MP set
target_id='<source_pub_secondary_target_stg>' where
target_id='<dest_pub_secondary_target_stg>';

```

Update EPUB_TARGET table

```
truncate table EPUB_TARGET;
```

Production target

```

Insert into EPUB_TARGET (TARGET_ID,SNAPSHOT_NAME,VERSION,CREATION_TIME,
MAIN_TARGET_ID,DISPLAY_NAME,DESCRIPTION,HALTED,FLAG_AGENTS,TARGET_TYPE)
values ('<source_pub_secondary_target>',null,14, trunc
(sysdate),'<source_pub_main_target>','<Production_Target_Name>',null,
0,0,0);
Insert into EPUB_TARGET (TARGET_ID,SNAPSHOT_NAME,VERSION,CREATION_TIME,
MAIN_TARGET_ID,DISPLAY_NAME,DESCRIPTION,HALTED,FLAG_AGENTS,TARGET_TYPE)
values ('<source_pub_main_target>','InitialTargetSnapshot-
<source_pub_main_target>',4, trunc(sysdate),
null,'<Production_Target_Name>',null,0,0,0);

```

Staging target

```
Insert into EPUB_TARGET (TARGET_ID,SNAPSHOT_NAME,VERSION,CREATION_TIME,
MAIN_TARGET_ID,DISPLAY_NAME,DESCRIPTION,HALTED,FLAG_AGENTS,TARGET_TYPE)
values ('<source_pub_secondary_target_stg>',null,14, trunc
(sysdate),'<source_pub_main_stg_target>','<Staging_Target_Name>',null,
0,0,0);
Insert into EPUB_TARGET (TARGET_ID,SNAPSHOT_NAME,VERSION,CREATION_TIME,
MAIN_TARGET_ID,DISPLAY_NAME,DESCRIPTION,HALTED,FLAG_AGENTS,TARGET_TYPE)
values ('<source_pub_main_stg_target>','InitialTargetSnapshot-
<source_pub_main_stg_target>',4, trunc(sysdate),
null,'<Staging_Target_Name>',null,0,0,0);
```

Enable constraints

```
alter table EPUB_TR_AGENTS enable constraint PT_AG_AG_ID_FK;
alter table EPUB_TARGET enable constraint TARGETS_PK ;
alter table EPUB_TR_AGENTS enable constraint PT_TR_PR_ID_FK;
alter table EPUB_TR_REP_TBL_MP enable constraint TR_TBL_PR_ID_FK;
```
